

JasperSoft Online Courses

Contact sales@jaspersoft.com to arrange a training session for your development team. Courses are limited to eight participants per session and are delivered online via online conference and teleconference.

Introduction to JasperReports

This four-hour course enables a software developer to develop JasperReports components and integrate them into a Java application. Topics include report development, embedding, and integration. Introduction to JasperReports provides software developers with an understanding of the JasperReports architecture and programmatic interfaces, as well as the use of iReport, a visual designer for pixel perfect report creation.

Cost

\$250/participant, minimum four participants (\$1,000)

Student Objectives

Upon completion of this course students will be able to:

- Install JasperReports class libraries and deploy them on a web application server
- Create JasperReports report templates
- Define report templates
- Compile report templates
- Fill and generate reports
- Integrate JasperReports with J2EE applications
- Deploy and locate report files
- Output paginated or flow-oriented HTML
- Invoke and view reports programmatically
- Print and export reports programmatically

Agenda

JasperReports:

- Introduction to JasperReports
- Creating JasperReports report templates
- Overview of the JasperReports API
- Integrating JasperReports with J2EE applications
- JasperReports resources

iReport:

- Introduction to iReport
- iReport functional overview
- iReport resources
- iReport product demonstration

Prerequisites

- Familiarity with Java programming

Introduction to JasperServer

This fast-paced four-hour course enables a software developer to develop JasperReports components and deploy them on JasperServer, as well as integrate them with external applications. Introduction to JasperServer provides software developers with an understanding of the JasperServer architecture and programmatic interfaces, as well as the use of iReport – a visual designer for pixel perfect report creation.

Cost

\$250/participant, minimum four participants (\$1,000)

Student Objectives

Upon completion, students will be able to:

- Create JasperReports report templates
- Deploy JasperReports with J2EE applications
- Deploy and locate report files
- Output paginated or flow-oriented HTML
- Invoke and view reports programmatically
- Print and export reports programmatically

Agenda

- JasperServer overview
- Using JasperServer
- Architecture & API overview
- Integration
 - UI customization
 - Security
 - DataStore
 - Information Interchange
- iReport report development
 - Introduction to iReport
 - iReport functional overview
 - iReport resources
- iReport product demonstration

Prerequisites

- Familiarity with Java programming
