

JasperSoft Preferred Partner Programs

JasperSoft is committed to building a strong ecosystem surrounding its products to deliver value-added products and services to JasperSoft customers around the world. JasperSoft offers Preferred and Certified Partner Programs for ISVs, and for Systems Integrators or Consultants.

For Software Vendors

The JasperSoft ISV Preferred Partner Program is designed to support you in embedding JasperReports into your for-sale application. JasperSoft consultants will train your engineers and review their implementation to ensure best practices. Your application will be listed as a Preferred Partner application on the JasperSoft web site, and once you have two referenceable implementations, you will graduate to Certified status. JasperSoft ISVs receive a discount on their support plan and a commission on their customers' JasperSoft support contracts.

For Systems Integrators and Consultants

JasperSoft Consulting Partners extend the reach of JasperSoft Professional Services by assisting JasperSoft customers to integrate JasperSoft products into their environment. You can become a Preferred Consultant, and get listed on the JasperSoft web site, by training a set number of consultants. Become a Certified Partner by achieving two referenceable JasperSoft implementations. JasperSoft Consulting Partners receive a discount on support, additional training, and the use of JasperSoft Professional Services engineers.

About JasperSoft

JasperSoft is the leading supplier of commercial open source reporting solutions. Building on its earlier successful commercial reporting solutions, JasperSoft has extended its reach into open source, giving its customers the choice of a commercial report server or an open source embeddable reporting library. JasperSoft operational reporting products enable companies to place precise operational information into the hands of decision makers.

JasperSoft is committed to commercial open source. Through its sponsorship of open source projects, JasperSoft is enhancing the open source offerings available to the world. By providing commercial support, it also offers its customers the comfort of technical support, and the project acceleration that comes from expert training and consulting services.
