

Jaspersoft and eBuilder Create Leading Edge Strategic Management Tool

eBuilder offers advanced Business Intelligence solution to over 100 clients globally

The Challenge

As the provider of an end-to-end B2B suite of Cloud Supply-Chain Management Processes, eBuilder needed a web-based business intelligence (BI) solution to enable its clients to swiftly analyze large amounts of information and make well-informed, critical business decisions. The right solution would provide self-serve access to standardized supply-chain management reports, and to automated report polling for selected recipients. Operating from a secure, central location in support of eBuilder’s hosted delivery model, reporting and other BI media would help eBuilder’s clients to measure, focus, and optimize the flow of outbound product shipments across worldwide distribution networks. Strategically, the BI solution would enable clients to, for example, benchmark performance of all parties in the multi-enterprise supply chain. At an operational level, clients already have fact-based reporting dashboards that enable them to pinpoint in-transit delays, making it possible to resolve issues before customers are impacted.

The Solution

eBuilder selected the Jaspersoft Business Intelligence Suite to create these critical capabilities, initially integrating the technology with eBuilder’s Software-as-a-Service (SaaS) Order Fulfillment and After Sales solutions. Jaspersoft’s unique, web-based architecture and flexible functionality enabled eBuilder to provide visually impactful, easy-to-use strategic measurement and monitoring capabilities across any business’s entire B2B supply chain. This information enables review and analysis of critical volumes and KPIs across the supply chain. Known for its efficient implementations and extensive carrier partnerships, eBuilder delivers standardized or customized solutions designed to solve business network challenges. eBuilder’s Supply Chain solutions enable a client to place greater focus on managing its supply chain performance and proactively identifying bottlenecks in this international network—before they impact the customer and the bottom line.

ORGANIZATION

eBuilder

INDUSTRY

Provider of standard and customized B2B Cloud processes

SOLUTION

Jaspersoft Business Intelligence Suite to measure, focus, and optimize the flow of outbound product shipments across worldwide distribution networks

RESULTS

The technology enables the creation of standardized reports and flexible data extracts, assimilating large amounts of information, enabling ebuilder’s clients to make well-informed, critical business decisions

“We chose the Jaspersoft solution because we needed to give our clients a flexible, leading-edge strategic management solution. By implementing Jaspersoft Business Intelligence, we have been able to achieve this and much more.”

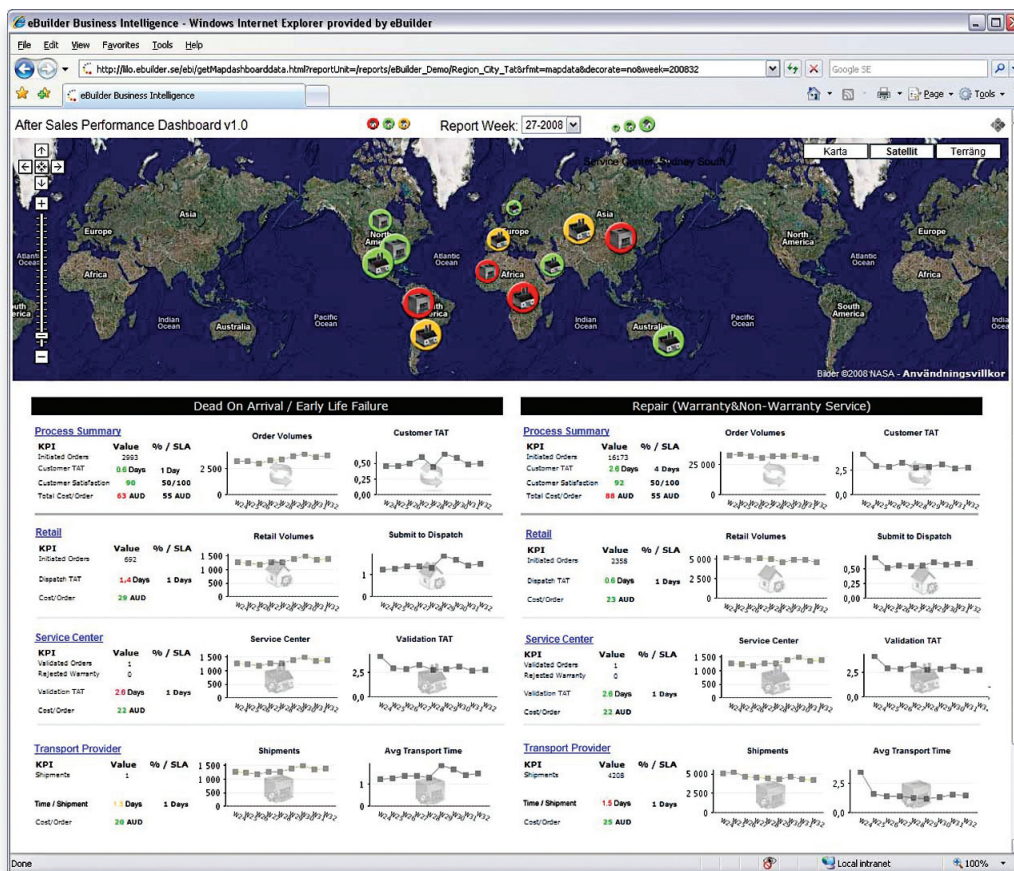

Roger Wallentin
Supply Chain Product
Manager, eBuilder

CASE STUDY

Leveraging eBuilder’s Supply Chain Product suite when integrated with Jaspersoft BI, eBuilder clients can:

- Boost efficiency and reduce costs, through fact-based supply chain measurement
- Rapidly access tactical and strategic volumes and KPIs across all stakeholders
- Achieve unprecedented supply chain visibility and control through a single-view Performance Dashboard

eBuilder evaluated leading open source BI platforms—and chose Jaspersoft for its ease of integration, and because it would live up to the robust reporting requirements anticipated for its clients. The IT team found the Jaspersoft technology to be stable, high-performing, and robust. “We seamlessly absorbed the technology into our system architecture and created standardized reports and flexible data extracts, assimilating large amounts of information, enabling our clients to make well-informed, critical business decisions,” said Roger Wallentin, Supply Chain Product Manager, eBuilder.
