

# Product Packages

	Community edition	Commercial edition	
		Reporting Platform	Enterprise Platform
<b>Reporting Engine</b> JasperReports® Library: Professional version	✓	✓	✓
<b>Pixel-perfect Report Designer</b> Offer a report designer, available as a desktop application. This tool, designed for creating intricate report layouts, comes in both Community and Pro versions.	✓	✓	✓
<b>Web-based Design Tool</b> JasperReports® Web Studio provides a comprehensive, web-based report designer..		✓	✓
<b>HTML5 Charts</b> Include animated HTML5 charts in reports.		✓	✓
<b>Maps</b> Visualize and interact with animated, global maps within your reports, featuring comprehensive coverage of all countries and regions.		✓	✓
<b>HTML Pro Component</b> Component facilitates embedding HTML content, including complete web pages, within JasperReports.		✓	✓
<b>JasperReports® Server App UI</b> The basic version of JasperReports Server, an environment designed for the end-user to run and manage reports.		✓	✓
<b>Save Interactive Viewing Changes</b> Enable the preservation of modifications made to interactive visualizations (like tables, crosstabs, and charts), including custom sorting and conditional formatting.		✓	✓
<b>Data Snapshots</b> Enable the caching and reuse of expensive processing result sets for reports and input controls.			✓

	Community edition	Commercial edition	
		Reporting Platform	Enterprise Platform
<b>Scheduling</b> Enable executing reports at scheduled intervals, either once or recurrently. Allows for the scheduling of jobs and the storage of output in the repository, or its distribution to various recipients via email.		Basic	✓
<b>Alerts</b> Set up alerts to monitor data and receive notifications upon reaching predefined thresholds.			✓
<b>Bursting</b> Generate multiple output documents from a single report, configurable by parameters, and distribute them via email to different recipients.			✓
<b>Domains – Metadata Layer</b> Simplify complex relational data structures into an abstract, graphical domain that non-technical users can easily navigate. This allows for self-service Ad Hoc report creation. The domain designer facilitates defining underlying table joins, filters, and calculated fields, ultimately arranging data into meaningful datasets for report creators.			✓
<b>Data Virtualization – Special JDBC Drivers</b> JasperReports Server facilitates data integration from various JDBC sources. It comes equipped with JDBC drivers for widely used databases such as Oracle, SQL Server, DB2, PostgreSQL, and MySQL. Furthermore, it supports additional JDBC drivers to access Hadoop-Hive, MongoDB, Cassandra, and more.			✓
<b>Ad Hoc Report Designer</b> Create self-service visualizations using a What You See Is What You Get (WYSIWYG) web-based interactive editor.			✓
<b>Business Intelligence Dashboards</b> Interactive web-based and embeddable dashboards offer dynamic access to data from diverse sources. These dashboards feature individual dashlets that support drill-down, drill-up, and hyperlink functionalities. They can also share and react dynamically to parameters and filters, and are composed of Ad Hoc views, reports, and other objects.			✓

	Commercial edition	
	Community edition	Reporting Platform      Enterprise Platform
<b>Audit Logging</b> Provides comprehensive diagnostics for administrators to monitor server health and performance. These include: <ul style="list-style-type: none"> <li>• <b>System Logs:</b> Capture errors in the server's running code.</li> <li>• <b>Auditing:</b> Stores key events such as login/logout times, user activity, report generation details, and object sizes.</li> <li>• <b>Monitoring:</b> Based on audit events, this feature provides a multi-dimensional domain for creating Ad Hoc views. This enables the generation of reports with key metrics, such as resource-intensive reports, facilitating optimization of data sources, and reports.</li> <li>• <b>Diagnostics:</b> Provides real-time data illustrating the overall health of your server instance.</li> </ul>		✓
<b>REST APIs</b> Facilitates interaction with all JasperReports Server features. This includes the ability to run, export, and schedule reports, manage repository resources (read and write), and administer organizations, roles, and users.		✓      ✓
<b>Jaspersoft® Visualize.js</b> A JavaScript library for embedding dashboards, reports, and Ad Hoc views into custom web applications. It offers complete control over parameters, input control management, and visualization interactivity.		✓
<b>Multi-tenancy</b> Serves multiple organizations or customers from a single instance of JasperReports Server.		✓
<b>Clustering</b> Support to run multiple instances of JasperReports Server. A cluster, composed of a group of servers (JasperReports Server or JasperReports® IO), functions as a single system. This configuration enables high availability, scalability, and parallel processing.		✓
<b>White-labeling</b> Provides complete rebranding capabilities for Jaspersoft products, including custom look and feel, logos, and themes.		✓

	Community edition	Commercial edition	
		Reporting Platform	Enterprise Platform
<b>Microservices</b>		Basic	At Scale
<p>JasperReports IO provides a specialized, highly scalable microservice for report generation. It offers both a REST API and a JavaScript API, enabling users to run, export, and interact with reports.</p> <ul style="list-style-type: none"> <li>• <b>Basic:</b> Included with the Reporting Edition, this provides basic functionality with a limit of 10 reports concurrent execution.</li> <li>• <b>At Scale:</b> Included with the Enterprise Platform, this enables JasperReports IO to scale based on usage with no limitation on concurrent reports, providing enhanced functionality for high-demand environments.</li> </ul>			

Jaspersoft commercial licensing provides comprehensive value, including:

- **Commercial Term License:** Customers receive a paid commercial term license for the Jaspersoft Platform, available in either the Reporting or Enterprise Edition. This grants usage rights for a defined period.
- **Comprehensive Support & Maintenance:** Your license includes continuous maintenance and access to Jaspersoft technical support. Support is tailored to your needs, with options ranging from Standard (24x5) to Premium (up to 24x7 for Severity 1 issues), ensuring critical assistance for your operations.
- **Warranties & Indemnities:** Benefit from included warranties and indemnities, providing peace of mind for using Jaspersoft in mission-critical operations and reinforcing our commitment to customer success.
- **Flexible Usage & Access Rights:**
  - **Platform:**
    - **Jaspersoft Reporting Platform:** A reporting platform that provides core reporting functionality focused on pixel-perfect report creation and distribution. It includes report design environments for internal use, as well as rights to one production and two non-production environments. The package also includes the reporting engine and JasperReports Server App UI.
    - **Jaspersoft Enterprise Platform:** A web-based reporting server for creating, viewing, scheduling and embedding reports and dashboards. The license includes report design environments for internal use, as well as rights to one production and two non-production environments. It builds upon the Reporting Platform by adding features such as Interactive Visualizations, Ad Hoc Report Designer, Business Intelligence Dashboards, Audit Logging, REST APIs, Visualize.js, Multi-tenancy, Clustering, and White-labeling.
  - **Usage:**
    - **Jaspersoft Platform Usage:** The Jaspersoft Platform Usage defines the authorized scale and capacity for a licensed Jaspersoft Reporting Platform or Enterprise Platform installation. It serves as a unit of measure, allowing customers to choose from one of a few best fit models to align their usage metric. This ensures flexible licensing that can be tailored to diverse deployment needs.
